

HOW TO EARN SUSTAINABLE EXTRA INCOME

AND MAKE IT YOUR BUSINESS FOR A LIFETIME

Fortune magazine called direct selling (of which network marketing is the largest segment) "the best kept secret in the business world."

The richest people in the world build networks; everyone else is trained to look for work -
Robert Kiyosaki -

Have you always dreamed about that island vacation?

Do you need money to send your children to University?

Do you struggle to make ends meet?

Are you worried about your retirement funds?

Fact is 80 % of South Africans are in debt and with the current economic situation we all need additional income.

Before you decide Network Marketing is not for you and that you don't do sales, please finish reading the article.

NETWORK MARKETING

There's a common myth that network marketing is all about selling, so many people who don't see themselves as "salespeople" shy away from it. The truth is, most of the people who are a huge success in network marketing aren't sales types, in fact, they hate selling and they tend to be more introverted.

So how do they do it?

They build their business by listening for people's needs and wants, and then providing an answer. They ask questions to uncover problems.

People aren't looking for products, services or even business opportunities; they're looking for solutions to life's problems. We know we can't solve all problems, but if you have money, most problems can be handled.

So, network marketing is not a sales business, it is rather a problem-solving and dream-building business.

The crucial part in this is to decide in what network marketing company you must get involved with. Choose a company that has stood the test of time, have good commission structures and products and are going strong.

You also need to see what training and support do they offer and it will be a bonus if they have a social responsibility part as well.

BENEFITS OF NETWORK MARKETING

1. Risk Free - Not everybody has capital to start a traditional business but any person who has a desire to earn good income can build a network marketing business. The entry costs are minimal and in a good network company you get immediate benefits in return.

2. Life Changing Journey - Your life will never be the same. It is not only about building a business and making money but you will meet extraordinary people on the way that will become lifelong friends. You will overcome your fears, learn to work with different kinds of people and will learn new skills that will all contribute to build a thriving business. This is an industry that produces millionaires on a consistent basis.

3. Leverage And Residual Income - The network marketing industry offers an individual the opportunity to create a residual income. With a credible company you can leave a legacy where your income can be inherited. Leverage is one of the key aspects of this business. The idea is to build a stable network which grows irrespective of whether you are there or not.

4. Flexibility - One can start this business part time and get involved full time when the right time comes.

WHY CHOOSE CARECARD?

Because we have

- A 13 year history of R60 mil commission pay-outs that has never faltered even once; value for money products for you and your family, nowhere else to be found, supported by reputable brands;
- National venues with great leaders that will assist you in conjunction with excellent training; excellent commission structures, bonuses and rewards;
- Ridiculously low start-up cost that includes benefits and charity contribution
